

## Carton Clamp Attachment

Carton Clamp Attachments - The Carton Clamp is one of the more adaptable lift truck attachments, used to be able to handle a lot of unsecured stuff on a pallet like for instance frozen cartons, appliances, furniture or canned goods. Large rubber pads carefully press the side of the load, gently lifting it up to transport it to its next place. Carton Clamps were particularly designed to be used in the electronics, beverage, appliance and warehousing companies. Companies that make use of these clamps save plenty of money because they don't need to acquire, maintain, store or ship pallets. Carton Clamps allow for pallet free handling, significantly saving warehouse room.

Typical features on all Carton Clamps, side-shifting allows for a more precise alignment to be attained throughout the position of the load. Turning pads made of aluminum and a slim arm design allows for close stacking of the load to be maintained. The close stacking eliminates unwanted spaces amid rows of stock plus additional space is acquired as all the pricey pallets are also eliminated.
