

## Drum Clamps

Drum Clamp - Forklifts are meant to deal with moving, lifting and storing pallets. For businesses which handle products inside drums, you should use an attachment to move, lift and store them. There are several drum forklift attachments which you can acquire for all of your drum moving, lifting and storing requirements. These attachments are specifically meant so as to handle drum containers - hence there is no chance of damage to the product or drum container whenever they are lifted, stored or moved.

### Drum Positioner And Grab

The drum positioner could be utilized to load and unload drums off of vehicles, racks, and drum stands. These are available in three and four tine models. This attachment is totally mechanical, therefore enabling the operator to operate all from the comfort of the lift truck seat. Able to move large and extra large plastic drums, steel, its capacity is 210 liters. This attachment is intended for drum pyramid stacking.

The drum grab is fork mounted and is designed with the sole purpose of handling steel drums which have rolling hoops. Though the reason for the design was to handle steel drums with rolling hoops, the drum grab can accommodate the moving of extra large and large plastic drums. Drum capacity maximum is 220 liters for plastic barrels and 210 for steel drums with rolling hoops.

### The Rotator

The drum rotator is a forklift accessory that mounts on to the blades themselves. The objective of the drum rotator is to be able to lift the drum and rotate it upside down. The drum fits in to the rotator utilizing a steel clamp which fits over the center of the drum. The rotation is executed by either a crank handle or a continuous loop chain. The crank handle is utilized for operations that occur beneath shoulder level. For operations which must occur above shoulder level, the continuous circle chain will be used.

Drum tines are straightforward fork mounted attachment which can be meant for unstacking or stacking 210-liter metal drums. Stacking requires nothing elaborate, only simple horizontal placement of the drums. The carriage-mounted attachments reduce the load center of the drums.

### Automatic Tongs

Drum tongs are obtainable in semi-automatic and automatic units. They are utilized in the open topped or tight head steel drum kinds. The drum pincers could be connected in several ways to the forklift. One method is to connect them underneath a fork-mounted hook. One more way is to connect them to a fork-mounted jib or a carriage mounted jib. Either the semi automatic and the automatic have a drum capacity of 210 liters. With the automatic, there is no need for the individual operating it to ever leave the seat of the lift truck.

### Rim Grip Handler

The Rip Grip Drum Handler is the perfect alternative for forklift attachments, when there is a necessity to stockpile drums with limited space available. This particular attachment could be used on either 120L and 210L drums. The Rim Grip Handler works by utilizing metal jaws to be able to grab the rim of the drum. It lifts the drum and sets it down without needing any room between the drums. The typical model used in the trade is a zinc-plated handler, though, this attachment comes accessible in stainless steel for the food and drink market.
