

## JLG Forklift Part

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora set out on a cross country journey in their RV. Newly retired, after spending numerous years working with his brother to develop their crane company into an market leader, John had no idea that important trip would allow JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision material handling equipment was the end result of a road trip.

During their trip, John reacquainted himself with previous business connections along the way. In combination with these conversations and a noteworthy event; two workers were tragically electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John uncovered a substantial market for a product that could swiftly and securely elevate people in the air to accomplish upkeep and other construction functions.

Upon returning from their travels, John formed a partnership with two friends and bought a metal fabricating company in McConnellsburg, Pennsylvania. In 1970, opening operations with a crew of twenty staff, they manufactured and sold the first JLG aerial work platform. The business incorporates many of the basic design essentials of that original lift into existing designs.

Since then, JLG Forklifts have come a long way from when Mr. John L. Grove came back from his fatefull cross-country trip and since the first JLG aerial platform entered the market. As of today, the company has expanded itself into quite a few global marketplaces and continues to develop innovative equipment to guarantee that customers are able to become safer and more efficient within their workplace.
